EC   Assignment #3 (NM or SA)

- Please refer to the same benchmark objective functions assigned to you in Assignment#1.
- Choose either NM or SA to solve the benchmark objective functions assigned to you in Assignment#1.
- Prepare a report of no less than 6 pages, including experimental results, analysis, and discussions, including parameters used, accuracy, consistency of experimental results. In particular, please make comparison with the results that you obtained by GA and PSO. Submit your report together with your source code before the deadline.
- Submitting late work will be penalized by a deduction of 10% per day of the total mark awarded for each assignment.
